

Practical Tips for IFR Hold Entries

Our speaker will present some tips and tricks to remove some of the errors pilots perform when entering the IFR Hold. Many such errors are caused by poor visualization of the hold and its entry (rather than physical inability to hold altitudes or headings and such), and that a systematic approach to visualization can be very helpful in forming the right mental picture consistently.

Directions: From Orlando area take Hwy 441 north thru Apopka toward Zellwood. 3 miles past Plymouth turn left into airport located along 441
From Mt. Dora area take Hwy 441 south thru Zellwood drive past airport on right to first right turn into airport entrance

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
